

ENERGY POLICY

We are committed to developing functional products based on carrageenan, alginates, fibers, and other gums obtained from sustainable natural sources:

- Incorporating resource conservation and energy efficiency into our production processes.
- Ensuring the availability of all necessary resources for the continuous improvement of energy performance, including access to relevant information.
- Complying with applicable legal and other requirements related to energy use, consumption, and efficiency.
- Promoting the integration of energy efficiency concepts into equipment, systems, and services during design, acquisition, and/or contracting stages, while maintaining interactive communication with our suppliers, distributors, and customers.
- Establishing, reviewing, and monitoring Energy Objectives and Targets that allow us to measure and continuously improve our energy performance.
- Ensuring that our personnel receive appropriate training to perform their duties, covering all aspects related to the Integrated Management System.
