

ENVIRONMENTAL POLICY

Gelymar is a company committed to care for the natural environment, developing its activities in a sustainable way, and assuming the following principles:

- Operate always in accordance with the applicable legal framework, as well as the environmental commitments voluntarily agreed with the environmental authorities or other interested parties.
- Evaluate, prevent and minimize the environmental impacts generated because of the economic activity and the projects developed.
- Operate under an Integrated Management System, which includes programs that pursue the continuous improvement of the environmental performance.
- Promote the efficient use and reduction of the use of natural resources and energy, incorporating energy efficiency criteria and the use of industrial by-products.
- Review periodically the Environmental Management, the compliance with this Policy and its adequacy over time, together with the objectives, controls and performance indicators.
- Involve our staff and other interested parties in the implementation and maintenance of this Policy. Ensuring that everyone receives the appropriate information to fulfill their roles, obligations and responsibilities.
